NICKV FILMS

Church Movie Event Guide

No Limbs, No Limits: The NickV Story

Plan a free church movie event, prepare your team and get ready for your first showing. Buying a license reserves your access. Your seven days begin only when you confirm activation on your watch page.

Choose your event license

Total attendees across all showings	License price in USD
Fewer than 500	$250
500 or more	$500

Count total expected attendance across every showing during your seven days, rather than the church's usual weekly attendance. Multiple showings are allowed. **ADMISSION MUST BE FREE.**

1 Confirm eligibility

This launch is for churches in the United States, Canada and U.S. territories. Other groups and additional territories are planned for a later phase in 2027, with timing to be confirmed.

2 Reserve your license

Choose the attendance tier, add your church and event details and complete checkout. You do not need to choose your event date today. Keep your confirmation and order number. Your timer has not started.

3 Choose your film version and account

Choose English with or without English subtitles. Spanish and Portuguese will be ready very soon. Open My License with the account used at checkout. Your church can use this one license login at the event; no separate staff account is required.

Prepare your event and showing

4 Plan your event

Choose a host, technical lead and welcome team. Set the venue and event date, plan a short introduction and allow time for conversation afterward. Invite your church, their friends and the wider community. Share the address, schedule, accessibility information and free admission details.

5 Check the picture and sound

Open your showing room and use the public trailer to test the projector, speakers, internet connection and full-screen controls. Check the English subtitle choice when the approved film version is available. The setup test does not start your seven-day timer.

6 Start your seven days when ready

Select Start my 7 days on your watch page and review the confirmation before you activate. The saved start and end times define 168 consecutive hours of access. Buying the license, signing in and opening the room do not start the timer. Pausing, closing the browser or signing out does not reset it.

7 Welcome your audience

Guests watch together at your event and do not need individual viewing accounts. Return to the same showing room for additional showings during your active window. Stay within the total attendance covered by the license and keep admission free.

8 Plan any further events

The player closes when the license expires. Another purchase creates a separate seven-day license at your attendance tier’s current price. It starts when you activate it. There is no automatic renewal or discounted renewal offer currently published.

Need help

Contact the licensing team through the website for event planning or account questions. On staging, use licensing.webdraft.online/#contact.

Staging review: the current player uses the public trailer. Final film delivery, approved subtitle assets and launch approval are pending. This planning guide is not a license certificate.
